EXPERIENCE

MakeMyTechnology

Software Developer

Bangalore, India

Dec 2025 – Present

- Engineered a cross-platform network monitoring and diagnostic tool (COTS) analogous to QXDM, enabling field engineers to diagnose real-time network issues across mobile and desktop environments.
- Developed the Android APK from scratch using Android Studio, delivering on-the-go RF parameter monitoring, iPerf-based data speed testing, and ping-based connectivity diagnostics for field use.
- Designed and packaged the Windows installer, streamlining laptop-based deployment and reducing setup time for field engineering teams.
- Integrated real-time signal strength tracking, network health dashboards, and automated diagnostic workflows, improving visibility into network performance across deployment sites.

MakeMyTechnology

Software Developer Intern

Bangalore, India

Sept 2025 – Nov 2025

- Assisted in architecting and testing network diagnostic modules for the COTS platform, supporting the core development team in delivering production-ready features.
- Integrated platform-specific components across Android and Windows environments, ensuring consistent behavior and reliability across both deployment targets.
- Collaborated with cross-functional teams to streamline internal tooling and operational workflows, accelerating development velocity during the internship period.

PROJECTS @ MakeMyTechnology

COTS – Network Diagnostic Tool | *Python, Android Studio, APK, Windows Installer, iPerf*

- Engineered a specialized cross-platform network monitoring and diagnostic tool comparable in functionality to QXDM, designed to support field engineers in live network environments.
- Developed the Android mobile APK from scratch, enabling real-time on-the-go diagnostics; independently built and packaged the Windows installer for seamless laptop deployment.
- Implemented real-time RF parameter monitoring (signal strength), automated iPerf-based throughput testing, and ping-driven connectivity stability validation.
- Delivered cross-platform accessibility across Android and Windows, ensuring the tool was immediately usable by field teams without additional configuration.

PROJECTS

Sentiment Analysis on Amazon Reviews | *Python, NLP, Flask, Scikit-learn, REST API* Apr 2025 – May 2025

- Designed and trained a sentiment classification model using NLP techniques to categorize Amazon product reviews as positive, neutral, or negative with high accuracy.
- Built an end-to-end ML pipeline encompassing data preprocessing, feature extraction, model training, and performance evaluation using Python and Scikit-learn.
- Deployed the trained model as REST APIs and developed an interactive Flask web application enabling real-time sentiment prediction for end users.

Crop Recommendation System | *Python, Machine Learning, Scikit-learn*

Aug 2024 – Oct 2024

- Architected a multi-algorithm crop recommendation system leveraging Decision Tree, Random Forest, Logistic Regression, and KNN classifiers to identify optimal crops for given conditions.
- Processed and analyzed agricultural datasets incorporating soil pH, nitrogen (N), phosphorus (P), potassium (K), temperature, humidity, and rainfall as predictive features.
- Delivered a production-ready ML model that empowers farmers with data-driven crop selection, improving agricultural decision-making efficiency.

Blink-it Sales Analysis Dashboard | *Power BI, Data Analysis, Data Visualization*

Oct 2023 – Nov 2023

- Designed and deployed an interactive Power BI dashboard visualizing key business metrics including sales performance, item categories, outlet types, and customer ratings for Blink-it.
- Uncovered actionable insights through trend analysis, identifying Supermarket Type 1 and Tier 3 outlets as the highest contributors to overall sales revenue.
- Executed data cleaning and transformation workflows to ensure data accuracy, consistency, and integrity prior to visualization and reporting.

TRAINING

Pantech Solutions

Remote

Machine Learning Engineer Intern

Feb 2024 – Apr 2024

- Executed hands-on machine learning projects, collaborating with cross-functional teams to design and deliver impactful predictive ML solutions.
- Analyzed large-scale datasets, engineered features, and developed predictive models to improve classification accuracy and enable data-driven decision-making.

Board Infinity

Remote

SQL Training

Jun 2023 – Aug 2023

- Completed an intensive 3-month SQL program covering relational database design, advanced query writing, joins, subqueries, aggregations, and data manipulation techniques.
- Constructed and optimized complex SQL queries through real-world assignments, improving data retrieval efficiency and supporting business reporting workflows.

TECHNICAL SKILLS

Languages: Python, SQL

Data Science & Machine Learning: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, NLP, NLTK, SpaCy

Big Data & Databases: Apache Hive, MySQL, PostgreSQL

Data Visualization & Reporting: Tableau, Power BI, Microsoft Excel

Frameworks & Backend: Django, Flask, REST APIs

Tools & Platforms: Git, GitHub, Linux, VS Code, Android Studio

EDUCATION

Lovely Professional University

Jalandhar, Punjab

Bachelor of Technology, Computer Science and Engineering – CGPA: 7.83

Aug 2021 – Jul 2025

Sri Chaitanya College

Tirupati, Andhra Pradesh

12th – MPC – Percentage: 95.80%

Jun 2019 – Apr 2021

Sri Chaitanya High School

Vempalli, Andhra Pradesh

10th – Science – Percentage: 90.8%

2018 – 2019
